What We Offer and How It Works

LeninVPN is a free, open-source VPN client based on AmneziaVPN. We provide functionality for creating a VPN on your own server, supporting self-hosted configurations across multiple protocols including AmneziaWG, WireGuard, OpenVPN, and others.

1.1 Self-Hosted VPN Setup

A user can set up their own VPN server by entering server access details (IP address, login, password or key) into the LeninVPN client. We do not collect, store, or transmit these details — they remain only on the user's device.

1.2 Configuration Import

Users may connect by pasting a configuration key, scanning a QR code, or importing a configuration file. All data is processed locally and never transmitted to LeninVPN servers.

1.3 Third-Party Services

The application may display links to third-party VPN services. When accessing such services, their own privacy policies apply. LeninVPN is not responsible for data collection practices of third parties.

// 02

What Data We Collect and Why

We collect the minimum amount of data necessary to provide our services, in compliance with the General Data Protection Regulation (GDPR).

Data Type	Purpose	Retention
Email address	Communication, subscriptions, affiliate payouts	Until consent withdrawn
Device ID	Key binding, configuration recovery	Duration of service
OS / App version	Compatibility & product improvement	Anonymised, indefinite
IP address	Temporary: block analysis & abuse prevention only	Not stored (except violations)

2.1 Data Provided by the User

- Email — for communication, subscriptions, or affiliate payouts
- Company name and number of employees — when filling out the business contact form
- Cryptocurrency wallet — for affiliate program payouts

2.2 Data Collected Automatically

- Device ID and operating system — for key functionality and internal statistics
- Application version — for compatibility and improvements
- IP address — processed temporarily for analyzing blockages and preventing abuse

2.3 What Data We Do Not Collect

We do not collect or store information about VPN usage, including traffic, visited websites, or session metadata. We do not receive data from third-party authorizations (Google, Apple, etc.) as we do not use such login methods.

// 03

How We Use Data

We use data solely for the following purposes:

- Providing access to our services and maintaining their stability
- Communicating with users at their request
- Processing payments and affiliate payouts
- Preventing abuse, spam, and DDoS attacks on our infrastructure
- Analyzing anonymized statistics to improve the product

- Sending offers and product news (you may unsubscribe at any time)

VPN traffic and user activity are never used for analytics or advertising purposes.

// 04

Transfer of Data to Third Parties

We do not sell or transfer your data to third parties. Exceptions are strictly limited:

- Data submitted through the business contact form is transferred to the Web3Forms service (see their privacy policy)
- Data provided during payment may be transmitted to payment providers where required by the payment processor
- Authorized government authorities — only upon a valid, official, and lawful request, submitted through proper legal channels, and only to the extent required by applicable law. We comply only with requests consistent with applicable legislation.

We adhere to a strict no-logs policy and do not store connection logs, traffic data, or VPN session metadata. We are technically unable to provide information about which user was connected to a specific server at a particular time.

// 05

Cookies and Analytics

On the LeninVPN website we use only what is necessary for proper operation:

- Language cookies — for correct interface display
- Anonymized statistical data (visits, referral sources, downloads, user regions, and devices) collected via self-hosted Matomo, Plausible, and Cloudflare Insights

These data are anonymized and cannot be used to identify the user. Disabling cookies in your browser will not affect access to the application.

// 06

Security

We implement modern technical, organizational, and physical security measures to prevent unauthorized access, alteration, or loss of data:

- Decentralized infrastructure — no single point of failure
- Role-based access control with the principle of least privilege
- Regular security checks, monitoring, and audits of all critical components
- End-to-end encryption for all VPN connections

// 07

International Data Transfer

Where data is transferred outside the country of registration, we apply Standard Contractual Clauses (SCC) approved by the European Commission, and employ data minimization, encryption, and anonymization. You

may contact us for further details.

// 08

Data Retention

We store data only for as long as necessary to provide our services or as required by law. After the retention period expires, data is deleted or anonymized without possibility of recovery.

// 09

Your Rights

Under applicable data protection laws, you have the right to:

- Access your personal data
- Correct or delete your data
- Withdraw your consent at any time
- Restrict or object to the processing of your data
- File a complaint with a supervisory authority

To exercise your rights, please contact us at: privacy@leninvpn.org or via GitHub Issues at github.com/EOSTribe/leninvpn/issues

// 10

Children

Our services are not intended for individuals under 16 years of age. If we become aware that a child has provided us with personal data, we will delete it immediately. Parents or guardians may contact us directly.

// 11

Limitation of Liability and Acceptable Use

Our services are provided "as is" and "as available." We make no express or implied warranties regarding uninterrupted operation, speed, security, or fitness for any particular purpose. LeninVPN is not liable for:

- Any indirect or consequential losses, including loss of profit or data
- Service disruptions caused by external factors, technical limitations, or actions of third parties
- Consequences arising from use of the service for purposes that violate applicable law

11.1 Acceptable Use

Users agree to use the VPN service only for lawful purposes and must not engage in:

- Illegal activities such as hacking, malware distribution, or fraud
- Sending spam, phishing, or deceptive messages
- Distributing, storing, or transmitting content that infringes copyrights or applicable law
- Attacks on networks or services of third parties (including DDoS attacks)
- Actions that harm other users, our infrastructure, or our partners

We do not keep activity logs, monitor, or record user traffic. However, if we receive credible abuse notifications from hosting providers, network operators, or copyright holders, we may take necessary measures to protect our infrastructure.

11.2 Content and Third-Party Resources

LeninVPN is not responsible for materials posted or transmitted by users or third parties through our services. Links to third-party websites are provided solely for user convenience.

// 12

Updates

This Policy may be updated from time to time. All changes will be posted on this page with a new effective date. Continued use of the service after changes are published constitutes acceptance of the updated Policy.

Based on AmneziaVPN	LeninVPN is built upon AmneziaVPN, an outstanding open-source VPN client developed by the Amnezia team. We express our gratitude to all contributors. Original source: github.com/amnezia-vpn/amnezia-client . LeninVPN is distributed under the GPL-3.0 license.
